Applicant: Schubert
Application No.: 10/682,223
Amendment After Allowance
Page 7

REMARKS

The applicant is submitting this amendment to address potential antecedent basis issues raised by the Examiner's Amendment proposed on January 10, 2011. In particular, by this amendment, the applicant proposes to use the exact terminology (i.e., "thermal-stabilizing filler") first found in line 9 of both the original and amended versions of claim 1. Additionally, insofar as the Examiner's Amendment effectively incorporated into claim 1 the limitation found in original claim 3, the applicant further proposes to insert the article "a" immediately before "glass" in claim 12 of the amended version of claim 1 so as to duplicate the exact wording from original claim 3.

Entry of this amendment will obviate the need for any further corrective action after the patent has granted, and such action is hereby requested.

Respectfully submitted,

Date: 31 Jan 2011
